	)	
Serial No.: 10/516,903	)	Group Art Unit: 2123
	)	
Filed: December 3, 2004	)	Examiner: Ayal I. Sharon

AMENDMENT

*Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450*

This is in response to the January 7, 2008 office action. This amendment is timely because the applicant is requesting a three-month extension of time.

The office action found claims 22 and 27 to be directed to patentable subject matter but rejected those claims because the examiner felt that the specification did not fully enable the use of the terms "radiating devices" and "radiation characteristics." The applicant requests reconsideration. Please amend the application as explained below.

Amendments to the claims are reflected on the listing of claims that begins on page 2.

Remarks begin on page 7.
